

THE SYSTEM OF INTELLIGENCE FOR INSTITUTIONAL CREDIT

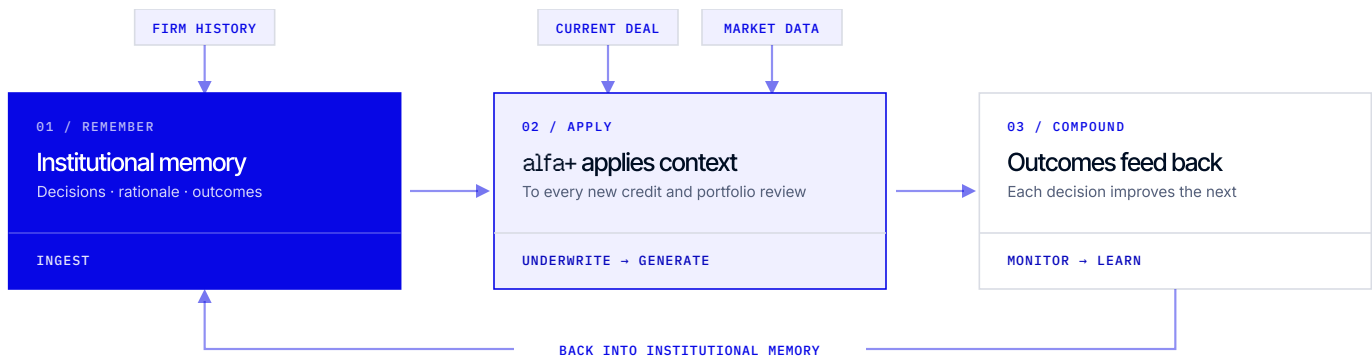

Institutional memory. Applied to every decision.

Creditspective preserves what your institution decided, why it decided it, and what happened next. alfa+ retrieves that accumulated context for every new credit and portfolio review.

HOW THE INTELLIGENCE COMPOUNDS

One decision cycle. Five continuous stages.

The current deal, market evidence, and the firm's own history meet in one traceable analytical record.

01 / REMEMBER

The institution keeps what people usually carry away.

- Funded, declined, and done-away deals
- Decision rationale and approved terms
- Actual performance across cycles

02 / APPLY

Every new deal is analyzed in institutional context.

- Current credit and market evidence
- Relevant precedent and prior outcomes
- Base-case and downside areas of focus

03 / COMPOUND

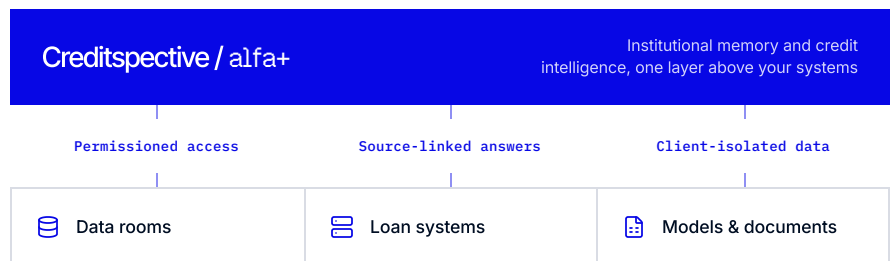

Every outcome improves the next credit decision.

- Ongoing variance and covenant insight
- Source-linked recommendations
- New evidence added to institutional memory

EXISTING-SYSTEM AGNOSTIC

Intelligence above your existing systems.

No rip-and-replace. Creditspective sits one layer above the systems you already run.

Existing systems stay in place.
